

Going from a Green Home to a Smart Home

From a Greener Home to a Smarter Home

- A green home is an environmentally-friendly, energy-efficient home
- [Quick Home Energy Checkup](#)
- [Home Performance with ENERGY STAR® Audit](#)
- [ENERGY STAR® appliances](#)
- Buy products through your utility company's marketplace for instant rebates
- Using smart technology can help make your home greener!

Temperature

- 68° in the winter & 78° in the summer
- Smart thermostats

Water

- High efficiency showerheads
- [WaterSense](#) labeled toilets
- Smart showers

Lighting

- Use natural light & LED bulbs
- Use smart bulbs, plugs, & strips

Appliances

- Unplug when not in use
- Smart fridge, washer, & more

Smart Meters

- Communicates consumption wirelessly to utility company & homeowner
- Eliminates estimated bills
- Better manage utility consumption
