Google Maps

What is Google Maps?
- A web-based map service providing accurate directions for walking, public transportation, and driving.
- Aerial and satellite views allow you to virtually visit anywhere in the world!

How to Use Google Maps
- Access Google Maps from your computer’s web browser.
- Use the app on your Android or iOS device.
- Enter your desired destination. If using Maps in a web browser, you’ll also need to enter your point of departure.
- Choose your mode of transportation.

Features and Functions
- Search terms: Enter key words for a list of locations (e.g. food, hotels, etc.)
- Street view: Allows you to see the actual street.
- Walking directions: Click on the walking icon and a trail will map the way to your destination.
- Traffic report: Check traffic along your route before you go!
- Go Live (app): Use your phone’s camera to map directions in real time.
- Parking (app): Drop a pin where you parked and map your way back!
- See inside: Airports, malls, stadiums, transit...
