

Connecting to the Internet

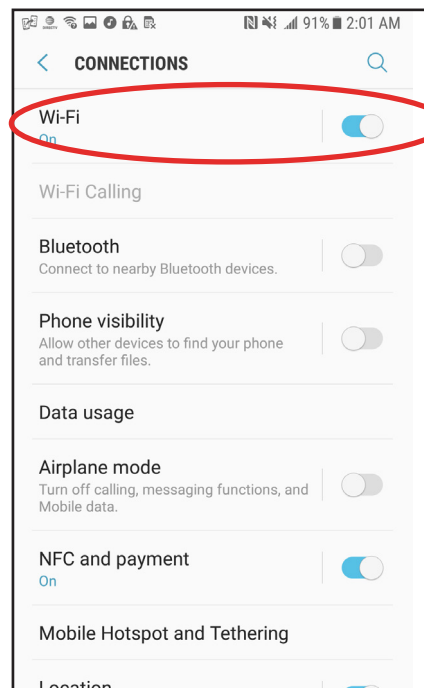

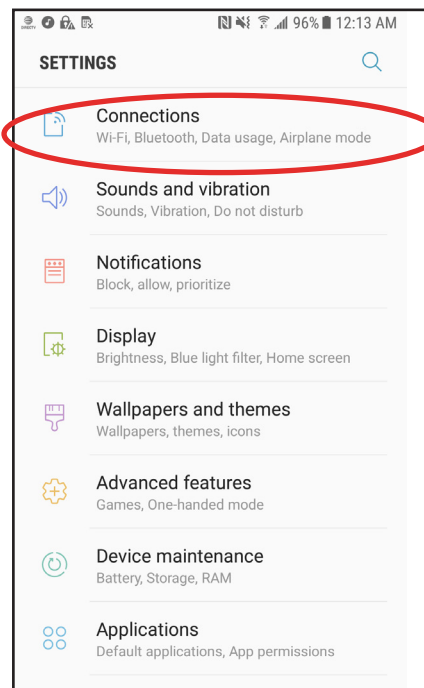

Connect a Mobile Device to WiFi

- 1 Locate the **WiFi symbol**  It may be located in your **Settings** folder. Look for a gear icon.

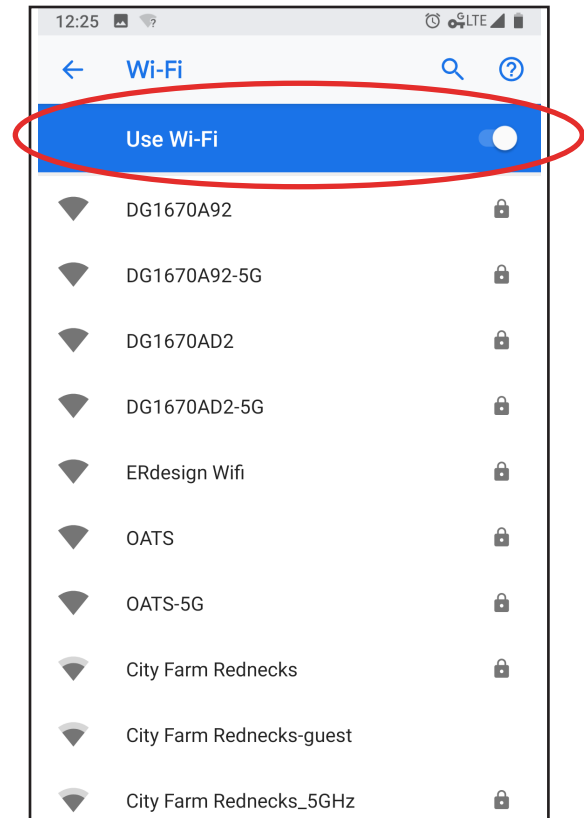

- 2 Once you're inside the "Settings" folder on your mobile device, look for the WiFi symbol. It might be called "Connections." Select this option to make sure your WiFi is on.

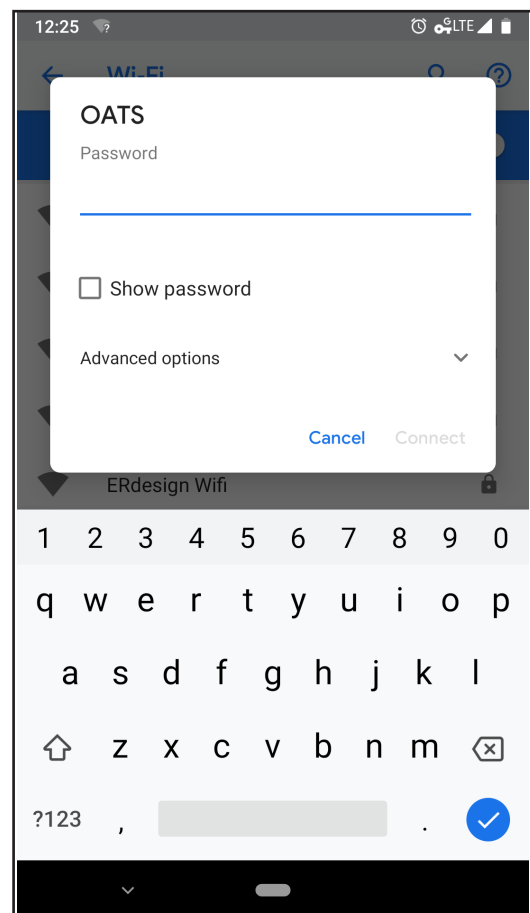

- 3 You must have your WiFi on and join a network to access the internet. In the image on the right, all of the networks except one require a password. Which network does not require a password?
-

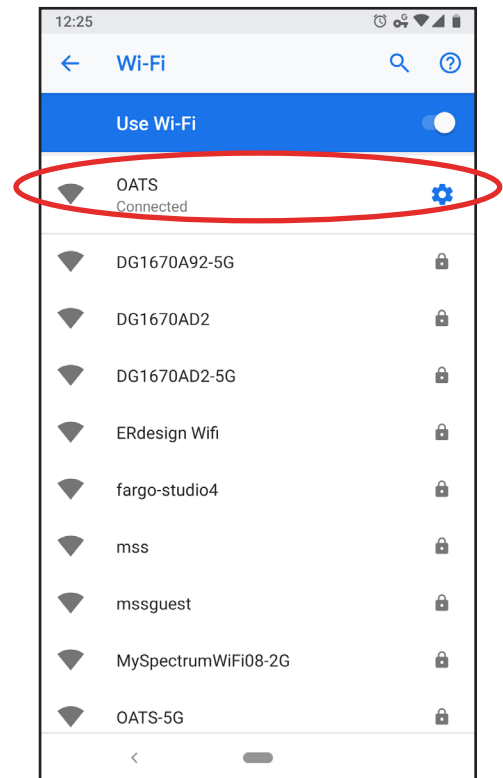

- 4 Selecting a password protected network will bring up a screen like the image on the right. You will see the name of the network and a prompt to enter the password.

- Many places that offer free WiFi will post the name of the network and password. If you don't see it, you can always ask!

- 5 When you have successfully connected your device to the Internet, you'll see a screen similar to this image. Notice that under the network name it says "Connected."

- 6 Select a browser or app on your device to begin exploring!

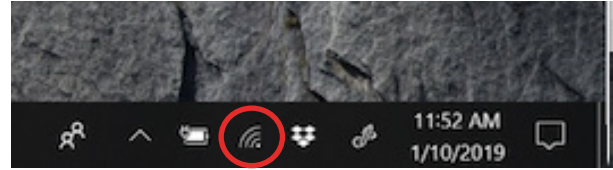

Some public WiFi networks do not require a password. You may be required to watch an ad or agree to terms to access the free WiFi — that's normal! However, if you're asked to provide personal information, do not move forward with joining the network!

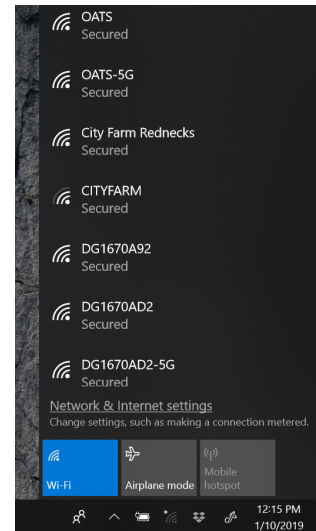

Connect Your PC to WiFi

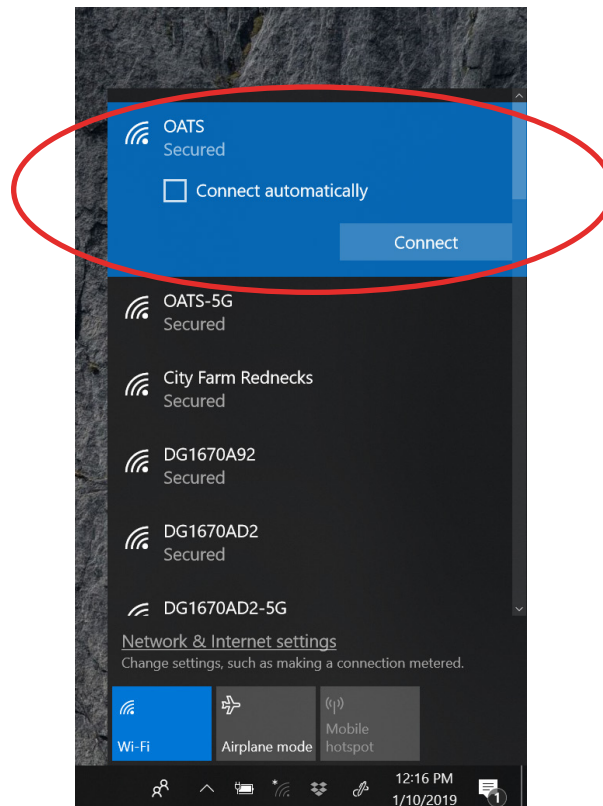

- 1 Locate the **WiFi symbol** in the bottom, right-hand corner of your desktop. Click on it.

- 2 Available networks will be listed. Any network that has the word “Secured” means that you will need a password to join that network.

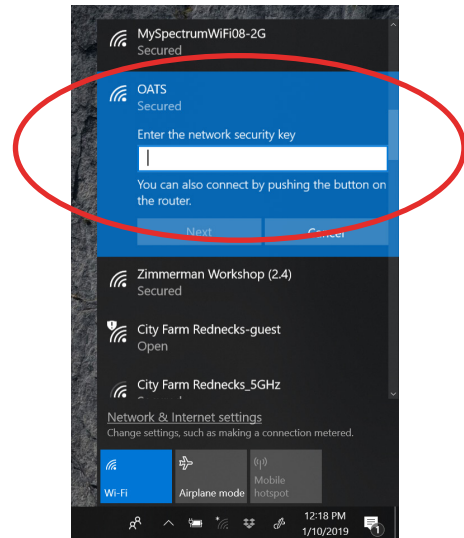

- 3 Click the network you want to join. Then click **Connect** if prompted.

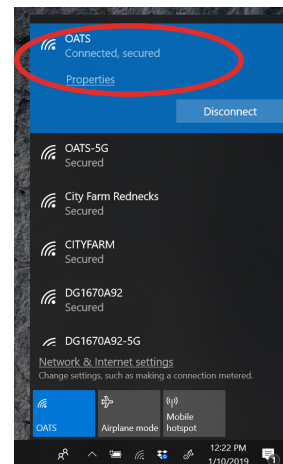

- 4 Enter the password when prompted.

- 5 You'll see confirmation that you're connected to the internet.

- 6 Return to your desktop and click on the icon for your browser to begin exploring the internet!

Check WiFi on a Chromebook

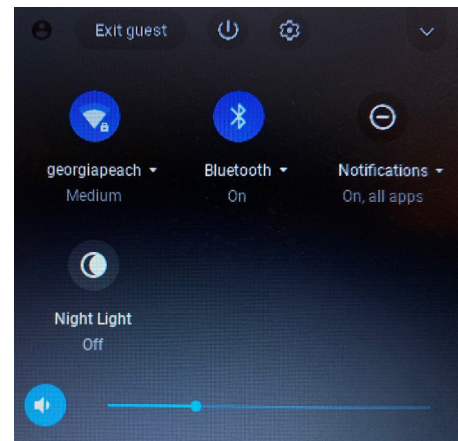

The steps for connecting a Chromebook to WiFi are very similar to those for the PC. Below you'll see how to check your WiFi connection on a Chromebook.

- 1 Slide your finger across your trackpad until you see your pointer on the **WiFi symbol**, then click or tap the trackpad.

- 2 A small window will open.

Is this device connected to a WiFi network? How do you know?

- 3 To see all available WiFi networks, click **WiFi**. A list of all available networks will open.

Which networks in the image on the right require a password? How do you know?
