

Understanding Bluetooth

What is Bluetooth?

- Technology that allows devices to communicate with each other wirelessly.
- Uses short-range radio frequencies
- Range is limited to about 30 feet

Bluetooth Uses in Everyday Life

- Connect your smartphone with:
- Wireless headphones and speakers, fitness trackers and smart watches
- **Trackers:** AirTag, Tile
- **Medical devices:** glucose monitors, hearing aids, thermometers, etc.
- **Driving:** hands-free calling, stream music and navigation from phone to the car's display

Pairing Devices

- Ensure that Bluetooth is enabled on both devices
- Make sure both devices are near each other
- Don't connect to devices you don't recognize

Android

iPhone
