Open Mic Night
Zoom Audio Suggestions for Performers

Different devices have different settings, but here are some suggested steps to improve your audio quality while performing on the Zoom platform:

Settings Menu

- In the lower left of the screen, look for the Mute button. Click on the small arrow (^) next to the microphone icon.

- Select "Audio" from the Settings menu that pops up.

- Check that the correct speaker and microphone are selected, and that each has an appropriate volume level set.

- Under "Audio Profile"
  - Select "Original sound for musicians"
  - Select "High fidelity"
  - Select "Echo cancellation"
  - DO NOT select "Stereo"

- Click the "X" in the corner to close the Settings menu
"Original Sound for Musicians"

- Return to the main Zoom window. The upper left corner may display a message that reads "Original Sound for Musicians OFF"

- If so, click that box so that it reads "Original Sound for Musicians ON"

- This setting allows the audio of your voice and instrument to be heard simultaneously.

- On some devices, you might see an area that says “More” with three dots. Click on it and turn on "Enable Original Sound"

- You may need to check this setting each time you use Zoom.
