

# Share Your Senior Planet Story with Enwoven

**Enwoven** is a visual and collaborative digital documentation tool.

The Enwoven website allows users to create a **digital collection** with different **multimedia tools** in order to **chronicle events**, **tell stories**, and **collect memories**.

These multimedia tools include:

- Photos
- Videos
- Audio recordings
- Interactive map
- Interactive timeline
- Social media posts

Users can upload, record, or pull from the web. Or they can collect files from their computers or mobile devices. Users can also search YouTube, Vimeo, and Google Images, or import from Instagram, Dropbox, Google Photos, and more.

The stories told through the Enwoven website are multi-layered, and when collaboratively created, can provide multiple perspectives. These stories can also combine pictures with recordings and commentary.

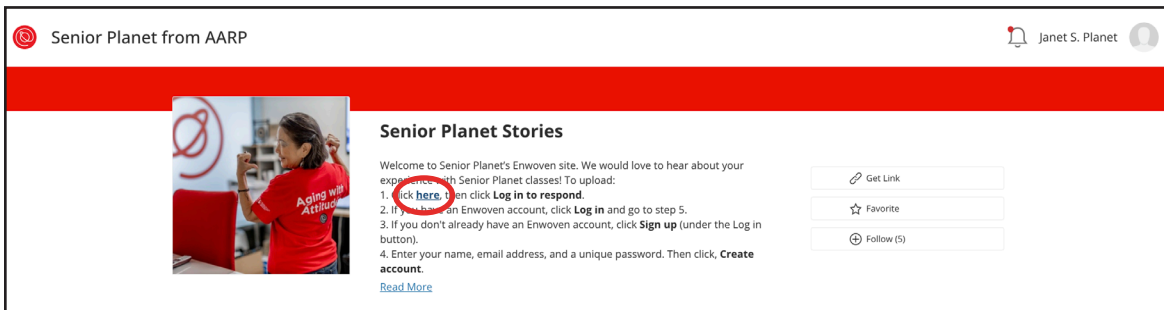

Projects are private and secure by default. However, users can decide to make them public and invite others to work with them on a project.
