Anti-Virus & Malware Removers At a Glance

Anti-Virus & Malware Removal Programs

- Anti-virus software can prevent malware from infecting your device.
- Malware removal software gets rid of malware that was accidentally installed.

Is My Device Infected?

Definitely Infected

- You see pop-ups, toolbars, or other unwanted software.
- Emails and messages are sent without your knowledge.

Possibly Infected

- Your device is slow, freezes, or crashes often.
- You have little disk space, but you don't have large files on your device.

Helpful Software

- Microsoft Defender (Paid Anti-Virus)
- Norton (Paid Anti-Virus)
- Avast (Free Anti-Virus)
- Malwarebytes (Free Malware Remover)
- AdBlock (Free Browser Extension)

Best Practices & Next Steps

- Don't click on suspicious links or download unknown files.
- Keep all software updated - only download from the official company site.
- Install both anti-virus and malware removal software, or check that your anti-virus has a malware remover.
- Schedule routine scans for your anti-virus and malware remover.
- Download an ad blocker for your browser.
