

Intro to AI

AI Fundamentals

- Artificial intelligence is a form of machine learning.
- Fueled by algorithms and massive amounts of data.
- Takes data and finds patterns.

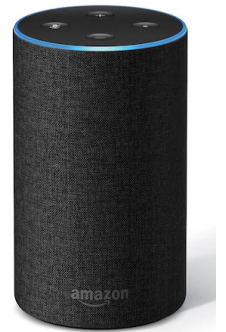

AI Cannot

- Perform commonsense reasoning
- Go beyond the data available to it
- Create a unique thought

AI in Everyday Life

- Voice Assistants: Alexa, Siri, Cortana, Google Assistant
- Self-driving cars
- Chatbots: provide 24/7 customer support
- Email: spam filters, predictive text

Using AI

- Sign up for a free Open AI account to start using Chat GPT:
<https://openai.com/blog/chatgpt>
- Explore DALL-E with the same login you create for CHAT GPT:
<https://openai.com/product/dall-e-2>
- Use Microsoft Copilot in Edge or any browser: copilot.microsoft.com
- Use Google Gemini: gemini.google.com
- Try using Chat GPT:
 - for gift ideas
 - to organize your thoughts
 - to find resources
 - to get simple explanations about a variety of topics
