

# RYAN

## What is Ryan?

Ryan is a first of its kind autonomous social robot. Ryan can talk, listen, express, understand, and remember.

**Emotive** Emotional recognition allows our robots to empathize and understand the full scope of a conversation.

**Interactive** Social robotics is all about human interaction and conversation – We've got it down to a science.

**Perceptive** Our robots use the information that they receive to read a situation and act autonomously to do the most good.

**Expressive** Our robots are able to express life-like human emotions and behavior. They are also able to speak their minds.

## Serious Games

Ryan comes loaded with 15 cognitive and physical games like:

- Robot-led yoga
- Wheel of Fortune
- Chess and Checkers

## Mental Health

Research studies show that as little as 10 minutes per day with Ryan leads to:

- Improved depression
- Improved cognition
- Improved wellbeing

## Social Inclusion

Ryan is designed to have engaging conversations. Ryan can:

- Recognize emotions
- Share emotions
- Encourage conversation

# RYAN

## WHY RYAN?

### Innovative Care

- Ryan can help address staffing shortages by providing a lower cost alternative to hiring.
- Ryan can be a low-cost addition to your wellness and activity programs by leading bingo, teaching an exercise class or having a pleasant conversation on any number of subjects.
- Ryan can help your sales team deliver memorable tours and visits to demonstrate that you provide an innovative care experience – he can even be a greeter!

### Engaged Residents

- Provide your residents with a meaningful, natural interactive companion because Ryan “remembers” what a resident likes through advanced AI.
- Residents reported a significant decrease in loneliness, increased happiness and 90% would recommend Ryan for a friend.
- 70% of residents showed improved or maintained cognitive function when interacting with Ryan.

### Satisfied Families

- Give your families the peace of mind knowing their loved one has an empathetic companion that always has time for them.
- Demonstrate to your families that you are delivering high-value, resident-centered care.
- Satisfied families lead to improved resident retention and occupancy.
